#### Report of Independent Auditors

Board of Commissioners
MBS International Airport Commission

We have audited the accompanying statements of net assets of MBS International Airport Commission (Commission) as of December 31, 2007 and 2006, and the related statements of revenues, expenses, and changes in net assets and cash flows for the years then ended. These financial statements are the responsibility of the Commission's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of MBS International Airport Commission as of December 31, 2007 and 2006, and the changes in financial position and cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

In accordance with Government Auditing Standards, we have also issued our report dated March 18, 2008 on our consideration of MBS International Airport Commission's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be considered in assessing the results of our audit.

The management's discussion and analysis is not a required part of the basic financial statements, but is supplementary information required by the Governmental Accounting Standards Board. The supplementary information is the responsibility of the Commission's management. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Saginaw, Michigan March 18, 2008

#### Management's Discussion and Analysis

#### **INTRODUCTION**

This section of the MBS International Airport Commission (Commission or MBS) annual audit presents an analysis of the Commission's financial performance during the fiscal year ended December 31, 2007. This information is presented in conjunction with the audited financial statements, which follow. The annual report consists of the following three parts: Management's Discussion and Analysis (MD&A); Basic Financial Statements; and other Supplementary Information. The financial statements include notes which explain in detail some of the information included in the basic financial statements. The information contained in this MD&A should be considered in conjunction with the information contained in the Commission's financial statements.

#### AIRPORT ACTIVITY HIGHLIGHTS

The airline industry saw some slight improvements early in 2007. Delta and Northwest both emerged from bankruptcy protection after shedding billions of dollars in annual costs. What little good news there was quickly evaporated as the year went on. Northwest's post-bankruptcy operating plan was based on oil being priced between \$60 and \$70 per barrel. Toward the end of 2007, oil was near \$100 per barrel which quickly eroded the annual cost savings the airlines had experienced earlier in the year. Throughout 2007, the airlines continued to consolidate their flight schedules and shrink domestic capacity. This was done in an attempt to gain every possible dollar of revenue in each and every flight. Finally, airline mergers continued to dominate the news in the latter half of 2007. This uncertainty helps keep the entire industry in question.

MBS passenger traffic in 2007 was 348,281 total passengers compared to 382,140 total passengers in 2006 and 408,546 in 2005. The 2007 budget was prepared using conservative estimates for airline passenger traffic. This was based on the following reasons: the ongoing Northwest Airline bankruptcy, reduction of capacity by Northwest Airlines, uncertainty surrounding potential airline mergers, and continued capacity restrictions at Chicago O'Hare Airport, the hub for United Express Service from MBS. When Northwest Airlines originally filed for bankruptcy in September of 2005, the airline began a series of schedule adjustments and equipment downgrades. These changes impacted MBS and continued to impact MBS through 2007. The ongoing O'Hare capacity restrictions have essentially put a cap on the number of MBS-Chicago flights per day. Additionally, United Express cut their weekend schedule into MBS.

#### REQUIRED FINANCIAL STATEMENTS

The financial statements of the Commission conform to accounting principles generally accepted in the United States of America. The Statements of Net Assets includes information on the Commission's assets and liabilities with the difference between the two reported as net assets. The Statements of Revenues, Expenses, and Changes in Net Assets identify the Commission's revenues and expenses for the fiscal years ended December 31, 2007 and 2006.

#### Management's Discussion and Analysis (continued)

#### <u>REVENUES</u>

For fiscal year ending December 31, 2007, total operating revenues were \$2,953,397, which is approximately 4.0% higher than 2006.

In general, airfield revenues held steady in 2007 compared to 2006. Landing fee revenues decreased by approximately 6.2%. This was due to the cuts in service by Northwest, which included less operations and some downsizing of DC-9 aircraft to regional jet aircraft.

Rental revenue totaled \$897,317 in 2007, which was almost a 5.0% increase from 2006.

Total concession fees for 2007 were \$1,478,846, which was a 6.7% increase over 2006.

For fiscal year ending December 31, 2006, total operating revenues were \$2,840,062, which is approximately 3.8% higher than 2005.

In general, airfield revenues held steady in 2006 compared to 2005. Landing fee revenues decreased by approximately 7.1%. This was due to the cuts in service by Northwest, which included less operations and some downsizing of DC-9 aircraft to regional jet aircraft.

Rental revenue totaled \$854,315 in 2006, which was almost a 6% increase from 2005.

Total concession fees for 2006 were \$1,386,533. For the most part, car rental revenue and parking lot revenue held steady with 2005.

#### **EXPENSES**

Total operating expenses for 2007 increased by approximately 1.4% over 2006. Salaries, wages, and benefits increased by approximately 4.5% due mainly to an increase in benefit costs. Utility costs also increased by over 1.7% due to energy cost increases. Maintenance expense had an increased budget for runway de-icing chemicals. This chemical enhances the safety of the runway during snow/ice events. Although more productive than sand and urea, it is more expensive. Professional fees also increased as we hired a land acquisition consultant. These costs should be reimbursed by FAA grant dollars when the land is purchased.

Total operating expenses for 2006 ended at \$3,143,032, which was approximately 5% higher than 2005.

#### Management's Discussion and Analysis (continued)

Salaries, wages and benefits increased by approximately 7% due mainly to an increase in benefit costs. Utility costs also increased by over 8% due to energy cost increases. Maintenance expense had an increased budget for runway de-icing chemicals. This chemical enhances the safety of the runway during snow/ice events. Although more productive than sand and urea, it is more expensive. Professional fees also increased as we hired a land acquisition consultant. These costs should be reimbursed by FAA grant dollars when the land is purchased.

#### THE AIRPORT AS A WHOLE

For the fiscal year ended December 31, 2007, current assets totaled \$19,669,724, which is 2.3% higher than the \$19,231,389 for 2006.

For the fiscal year ended December 31, 2006, current assets totaled \$19,231,389, which is 2.4% higher than the \$18,777,547 for 2005.

Below is a summary chart of assets, liabilities, and net assets.

		December 31

Postretirement health benefit expense	95,679	108,731	92,796
Loss from operations	(2,584,873)	(2,920,087)	(2,336,201)
Nonoperating revenues			
Interest income	879,737	837,741	522,967
Passenger facility charges	632,365	533,221	539,925
Capital contributions in Federal Aid Projects	3,024,824	908,888	716,209
Decrease in net assets	1,952,053	(640,237)	(557,100)
Net assets at beginning of year	39,883,622	40,523,859	41,080,959
Net assets at end of year	\$41,835,675	\$39,883,622	\$40,523,859

### **FUTURE OUTLOOK**

Although 2007 held steady for most of the year, the events throughout the year, continued rising fuel costs, and the Northwest capacity reductions had a dramatic impact on MBS passenger traffic. Monitoring the ongoing situation at Northwest, as well as potential airline mergers, will continue to be a top priority for 2008.

Net cash used for operating activities	<u>\$ (81,280)</u>	\$ (327,928)

#### Notes to Financial Statements

December 31, 2007

#### 1. Organization

The MBS International Airport Commission (Commission) was organized on August 18, 1941 by the cities of Midland, Bay City, and Saginaw to operate a municipal airport under Act 344, Public Acts of 1939, as amended. On July 21, 1961, all interests of the City of Bay City in the Airport were transferred to Bay County. On October 20, 1994, a resolution was enacted by the Commission to officially change the name of the Airport from Tri-City International Airport to MBS International Airport Commission (Airport).

The governing board of the Commission is appointed by the respective municipalities. Each municipality appoints three members to the Commission and each serves a term in accordance with the terms of the municipality. The Commission controls the employment of the Airport Manager, who is responsible for overseeing the day-to-day operations of the Airport.

#### 2. Significant Accounting Policies

#### **Basis of Accounting**

The financial statements have been prepared on the accrual basis of accounting, whereby revenues and expenses are recognized in the period earned or incurred.

In accordance with Governmental Accounting Standards Board (GASB) Statement No. 20, Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that Use Proprietary Fund Accounting, the Commission follows GASB guidance as applicable to enterprise funds and FASB Statements and Interpretations, Accounting Principles Board Opinions and Accounting Research Bulletins issued on or before November 30, 1989 that do not conflict with or contradict GASB prouncements.

#### Statement of Cash Flows

For purposes of reporting cash flows, cash and cash equivalents include cash on hand, restricted cash, interest and non-interest bearing deposits, and short-term investments with an original maturity of three months or less.

Cash and cash equivalents total \$21,364,740. Of this amount, approximately \$15,440,000 is in the Master Plan Projects Fund, \$619,000 is in the Emergency Capital Fund, \$2,417,000 is in other reserved funds, \$2,062,000 is in the Passenger Facility Charges Fund and \$827,000 is in other operating funds.

Notes to Financial Statements (continued)

#### 2. Significant Accounting Policies (continued)

#### Accounts Receivable

Accounts receivable are stated at the outstanding principal balance adjusted for any charge-offs. Management closely monitors outstanding balances and writes-off receivables when the receivable is deemed uncollectible. Management believes any realization losses on the outstanding balance at December 31, 2007 and 2006 would be immaterial; therefore, no allowance for uncollectible accounts is recorded.

#### Inventory

Inventory, which consists principally of various supplies, is valued at the lower of cost or market on the first-in, first-out method.

#### Capital assets

Capital assets are stated at cost and are depreciated over their estimated lives by the straight-line method.

#### Capital Contributions

Certain expenditures for Airport capital improvements are significantly funded through the Airport Improvement Program of the Federal Aviation Administration (FAA) with certain matching funds provided by the State of Michigan and the Commission, or from various state or federal grant programs. Capital funding provided under government grants is considered earned as the related allowable expenditures are incurred. Capital contributions arising from federal and state funding of Airport capital projects are classified as nonoperating revenue. Construction-in-progress at December 31, 2007 and 2006 included various projects funded primarily through federal and state contributions.

#### Revenue Recognition

Revenue, other than passenger facility charge revenue, is recognized on the accrual basis. Passenger facility charge revenue is recorded when received since the Airport has no control over the timing or amount of receipts.

#### Retirement Plan

The Commission has a defined benefit pension plan covering substantially all employees. The plan is administered under the State of Michigan Municipal Employees' Retirement System (MERS). The Commission's policy is to recognize pension costs based on actuarially determined required contributions.

Notes to Financial Statements (continued)

#### 2. Significant Accounting Policies (continued)

#### Postretirement Health Benefits

The Commission provides certain health-care insurance benefits for retirees; substantially all employees may become eligible for these benefits. The Commission estimates these benefits by calculating the amounts that the Commission may pay to vested and retired employees taking into consideration current insurance costs, adjustments to insurance costs at age 65 and a life expectancy of 76 years old. The Commission has not had a recent actuarial valuation to determine what the required liability may be under GASB Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions, which will be applicable for the year ended December 31, 2009.

#### **Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. A significant estimate at December 31, 2007 and 2006 relates to postretirement health benefits where \$1,603,626 at December 31, 2007 and \$1,474,951 at December 31, 2006 has been accrued. Although management believes the assumptions used and amounts recorded are reasonable, a change in circumstances could result in the actual results being different from the estimated accrual.

#### 3. Cash and Cash Equivalents

Certain funds not required in day-to-day operations are invested in cash equivalent products. Cash balances totaling \$20,756,427 were on deposit (\$18,478,181 in interest-bearing accounts) in well capitalized, sound financial institutions which are covered by federal depository insurance of \$100,000 for each depositor. At December 31, 2007, \$20,456,427 of such deposits are uninsured and uncollateralized; therefore, subjecting the Airport to custodial credit risk. Custodial credit risk is the risk that in the event of a bank failure, the Airport's deposits may not be returned. The Airport does not believe that this deposit concentration represents any undue custodial credit risk.

At December 31, 2007, the Commission had \$2,062,159 in restricted cash related to Passenger Facility Charge (PFC) revenue in excess of expenses. See Note 10 for further information.

# Notes to Financial Statements (continued)

### 5. Operating Revenues

The operating revenues of the Commission consist primarily of landing fees, rentals, and concession fees. Operating revenue, by customer, for the year ended December 31, 2007 and 2006 is approximately as follows:

	2007	2006
Northwest Airlines	\$ 496,000	\$ 522,000
SkyWest Airlines	235,000	235,000
Avflight	162,000	184,000
Aerodynamics	119,000	111,000
Pinnacle	53,000	46,000
Mesa	33,000	38,000
APCOA, Inc. (parking lot concessionaire)	844,000	795,000
Car rental companies	608,000	562,000
All other customers	403,000	347,000
•	\$2,953,000	\$2,840,000

Agreements for such fees are generally renegotiable after periods of one to ten years.

Notes to Financial Statements (continued)

#### 5. Operating Revenues (continued)

Revenue from rental of terminal facilities to commercial airlines was approximately \$542,000 for the year ended December 31, 2007 and \$526,000 for the year ended December 31, 2006. Landing fee revenue from these airlines was approximately \$322,000 in 2007 and \$344,000 in 2006 and is covered under agreements which expire September 30, 2008.

Minimum future revenue from non-cancelable rental and concession agreements in effect at December 31, 2007 is as follows:

<u>Year</u>	Amount	
2008	\$ 923,000	
2009	457,000	
2010	313,000

#### 6. Retirement Benefits

Plan Description – The Commission participates in the Municipal Employees' Retirement System of Michigan (MERS), an agent multiple-employer, state-wide, public employee pension plan created under Act 135 of the Public Acts of 1945. The plan operates under Public Act 220 of 1996 and the MERS Plan Document as revised. The Commission participates in the defined benefit program of the MERS plan. MERS issues an annual financial report, which includes financial statements and required supplementary information. The report may be obtained at Municipal Employees' Retirement System of Michigan, 477 N. Canal Rd., Lansing, Michigan 48917.

The plan covers all full-time employees. Participating employees consisted of 26 active participants, 15 retirees and beneficiaries, and 2 vested former employees as of December 31, 2006, the date of the most recent actuarial valuation. Additional information concerning the retirement plan as of December 31, 2007 follows:

Normal Retirement: In general, age 60 with 10 years or more of credited service. Non-union participants also have the option of age 55 with 25 years or more of credited service. The benefit is two and a quarter percent of the member's three-year final average compensation for each year of service. Union participants have the option of age 55 with 25 years or more of credited service. The benefit is two percent of the member's five year final average compensation for each year of service. Normal retirement for the Airport Manager is 25 years of service and out.

Notes to Financial Statements (continued)

#### 6. Retirement Benefits (continued)

Funding Policy – The Commission establishes benefit provisions. Subject to union contracts, the Commission has the authority to amend the benefit provisions within the options allowed by MERS. All employee contributions are refundable if the employee elects to terminate vesting rights or is not vested at the date of termination of employment. Effective in 1989, the plan no longer requires employee contributions. The Commission's funding policy provides for monthly (quarterly in 1997 and prior years) contributions to MERS. The contributions are actuarially determined, expressed as percentages of annual covered payroll, and designed to accumulate sufficient assets to pay benefits when due. The MERS Retirement Board establishes the funding methods.

Annual Pension Cost – For 2007, the Commission's actual pension contributions of \$230,051 exceeded the annual pension cost of \$215,568, thereby decreasing the net pension obligation by \$14,483. The Commission did not have a net pension obligation at transition, determined in accordance with GASB Statement No. 27, as their actual contributions made equaled the actuarially determined required contributions for each year during the "look-back period."

The actuarial valuation is performed as of the last day of each fiscal year for the plan and determines contribution requirements for the second following fiscal year. The 2007 contributions were based on the December 31, 2005 valuation. The normal cost and actuarial accrued liability are determined using the entry age normal cost method. Unfunded actuarial accrued liabilities are being amortized as a percentage of payroll over a period of 29 years. Significant actuarial assumptions used in determining the pension benefit obligation included (i) a rate of return on the investment of present and future assets of 8.0% per year compounded annually, (ii) projected salary increases of 4.5% per year compounded annually, attributable to inflation, (iii) additional projected salary increases ranging from 0.0% to 8.4% per year, depending on age, attributable to seniority/merit, and (iv) the assumption that benefits will increase 2.5% annually after retirement. Significant actuarial assumptions used to compute contribution requirements were the same as those used to compute the pension benefit obligation. The actuarial value of assets is determined on the basis of a valuation method that assumes the funds earn the expected rate of return (8.0%) and includes an adjustment to reflect market value.

Year Ending	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation (NPO)	Cumulative NPO
12/31/07	\$215,568	106.7%	\$(14,483)	\$(66,821)
12/31/06	169,824	134.5	(58,606)	(52,338)
12/31/05	137,328	115.8	(21,643)	6,268

Health Insurance – The Commission provides continued health insurance to eligible retirees and their spouses in the form of a Staff Plan and a Union Plan. During 2002, the Commission re-evaluated the liability by projecting the estimated health-care benefits for those employees that have vested in the plan and those already retired. Management intends to re-evaluate the calculation annually and make the appropriate adjustment. Postretirement health benefit expense was \$95,679 for 2007 and \$108,731 for 2006.

### Notes to Financial Statements (continued)

#### 7. Required Supplemental Information on Retirement Plan

The following table shows the required three-year historical trend information relating to the funding progress of the Commission's retirement plan.

Actuarial Valuation Date December 31	(1) Actuarial Value of Assets	(2) Actuarial Accrued Liability (AAL)	(3) Unfunded (Overfunded) AAL (UAAL) (2) - (1)	(4) Funded Ratio (1)/(2)	(5) Covered Payroll	UAAL as a Percent of Covered Payroll (3)/(5)
2004	\$4,865,622	\$6,030,522	\$1,164,900	81	\$1,037,872	112%
2005	5,031,747	6,627,188	1,595,441	76	1,089,974	1 <b>46</b>
2006	5,353,853	7,036,322	1,682,469	76	1,052,213	160

#### 8. Deferred Compensation Plan

The Commission established a deferred compensation plan to provide retirement income and other deferred benefits to its employees in accordance with the provisions of Section 457 of the Internal Revenue Code of 1986, as amended. Contributions to the plan totaled \$71,646 in 2007 and \$64,785 in 2006.

#### 9. Construction-in-Progress Commitments

The Commission is participating in several capital projects whereby the Federal and State governments have agreed to pay for a portion of the project with the remainder to be paid by the Commission. As of December 31, 2007, the Commission has paid more than its portion of the outstanding commitments to date on these projects and has recorded a receivable for this amount.

#### 10. Passenger Facility Charges

Effective June 28, 1991, Federal Aviation Regulation 158 established a Passenger Facility Program. Under this regulation, airports may be authorized to impose an airport Passenger Facility Charge (PFC) of \$1, \$2, or \$3 per enplaned passenger at a commercial service airport it controls. The proceeds from such PFCs are to be used to finance eligible airport-related projects that preserve or enhance safety, capacity, or security of the national air transportation system, reduce noise from an airport that is part of such system, or furnish opportunities for enhanced competition between or among air carriers.

The rule sets forth procedures for public agency applications for authority to impose PFCs for Federal Aviation Administration (FAA) processing of such applications, for collection, handling, and remittance of PFCs by air carriers, for recordkeeping and auditing by air carriers and public agencies, for terminating PFC authority, and for reducing Federal grant funds apportioned to large and medium hub airports imposing a PFC.

Notes to Financial Statements (continued)

#### 10. Passenger Facility Charges (continued)

The FAA approved MBS International Airport's first Passenger Facility Charge application in the amount of \$1,400,000 (amended to \$874,682) to reimburse the local share of Airport Improvement Projects (AIP) which occurred between 1991 and 1997. This application was completed in 1999. The second PFC application in the amount of \$812,050 (amended to \$438,614) was completed in 2002. The third PFC application in the amount of \$4,234,047 (amended to \$2,860,985) was completed in 2006. The fourth application in the amount of \$1,999,052, and the fifth application in the amount of \$1,378,794 to reimburse the local share of subsequent Airport Improvement Projects were also approved by the FAA. These applications were approved for the collection of \$3 per enplaned passenger, of which the airlines retain \$.08 on each \$3 charge as a collection fee and forward the remaining \$2.92 to the Airport. During 2004, the collection fee the airlines can retain increased to \$.11, with the remaining \$2.89 being forwarded to the Airport. During 2007, the collection per enplaned passenger increased to \$4.50, of which the airlines retain \$.11 and forwards the remaining \$4.39 to the Airport. The Airport received \$632,365 (including \$82,386 of interest income on excess PFC revenue) in PFC revenue in 2007 and \$533,221 (including \$59,165 of interest income on excess PFC revenue) in 2006. The Airport has received \$2,062,159 as of December 31, 2007 and \$1,565,719 as of December 31, 2006 in PFC revenues in excess of eligible expenditures. This amount has been classified as restricted cash and net assets and maintained in a separate cash account.

# Report of Independent Auditors on Other Financial Information

Board of Commissioners
MBS International Airport Commission

Our report on our audits of the financial statements of MBS International Airport Commission appears on page one. Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The accompanying details of operating revenues and details of operating expenses are presented for purposes of additional analysis and are not a required part of the financial statements. Such information has been subjected to the auditing procedures applied in our audits of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole.
